Sewage Backflow Acknowledgement

It shall be the applicant's responsibility to verify if the drainage of any plumbing fixtures are located below the next upstream manhole or below the main sewer level. Where fixture openings are below the next upstream manhole or below the main sewer level, backflow preventers shall be installed in accordance with 710.1 of the current Oregon Plumbing Specialty Code (OPSC). Failure to install such device could result in crawl spaces and homes filling with sewage when main sewer systems are backed up. By signing this form you acknowledge this requirement and the risk that comes with failing to install such device when required.
