

CONSERVATION

Your ultimate guide to water efficiency

TOILET REBATE PROGRAM

In an average home with older plumbing fixtures, nearly one-third of the water used indoors is flushed down toilets. In order to keep more water from going down the drain, The City of Ashland offers rebates to help property owners replace their old relics with new low-flush models.

LAWN REPLACEMENT PROGRAM

A rebate is being offered by the City of Ashland for the removal of live, maintained and irrigated lawn that is replaced with climate appropriate, low water use landscapes and efficient irrigation systems.

SPRINKLER EVALUATION PROGRAM

Evaluations are offered during the summer months and consist of a comprehensive assessment of the design, operation and management of your sprinkler system. Assistance with sprinkler controllers and watering schedules will also be provided. A brief report outlining general observations of your sprinkler system as well as suggestions for future use will be mailed following the evaluation. This is a great opportunity to learn ways to save water and money while still maintaining a healthy and attractive landscape.

Rebates are given to customers who purchase resource efficient clothes washers. These machines use up to 40% less water and up to 50% less energy. Clothes washers with the ENERGY STAR label qualify for an \$80 City rebate if the home has an electric water heater and \$50 if the home has a gas water heater.

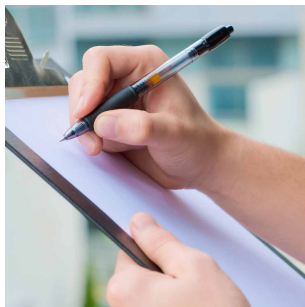

WASHING MACHINE REBATE

ELECTRIC DRYER REBATE

SMART CONTROLLER REBATE PROGRAM

Residential outdoor water use in the United States accounts for more than 9 billion gallons of water each day, mainly for landscape irrigation. Experts estimate that as much as 50 percent of this water is wasted due to overwatering caused by inefficiencies in irrigation methods and systems. Irrigation control technologies can significantly reduce overwatering by applying water only when plants need it.

GIVEAWAYS

The City of Ashland is giving away showerheads, bathroom aerators, kitchen aerators, and moisture meters to all Ashland Residents.

FREE!

INDOOR WATER ANALYSIS

A City Water Conservationist will evaluate the efficiency of your plumbing fixtures and help replace showerheads, faucet aerators, and supply you with other tools to reduce water used.
