

A Self-Guided Green Living Tour

Start here! Explore innovative ideas to make your home more green.

Get started:

Use the North Mountain Park Green Living Guide brochure and the accompanying map in the rack below for a self-guided tour of North Mountain Park's sustainability efforts.

Explore the park's on-site demonstrations, all of which model creative ways to make your home more green!

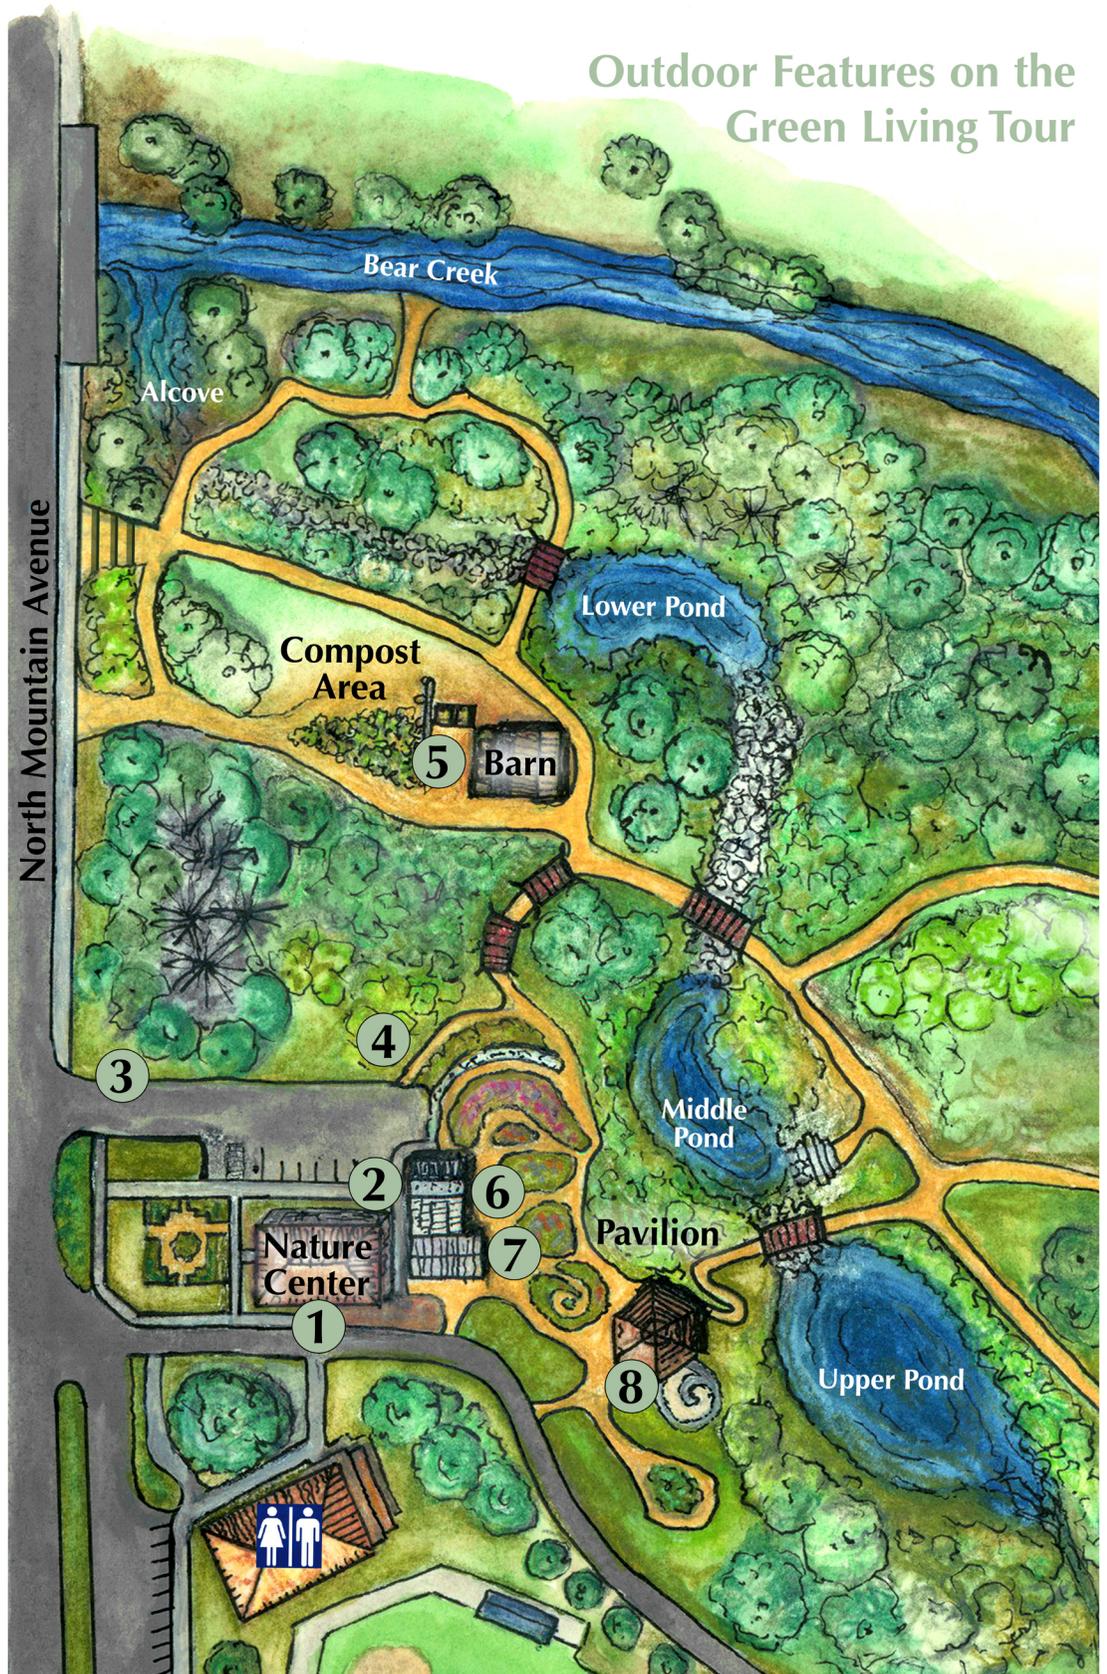

Outdoors:

Begin your tour outside. Start with the TREX decking below your feet, then walk around the porch to see the energy-efficient windows, the bicycle rack and the motion-sensored lighting.

Many of the remaining outdoor features enhance the park's demonstration gardens. All are within an easy walk and are clearly labeled on the map.

Indoors:

Take a look inside the Nature Center for additional green ideas. Explore the exhibit room, the nearby lab room, and the bathroom to see everything on the list.
