

NMP Activity

Practice Contour Drawing

Try drawing the “edges” of your plant sample. Don’t look at the paper or your pencil. Keep your eyes on your plant, and just draw what your eyes are seeing. Your final product, on this page, may look strange, but this activity will “loosen up your brain”.

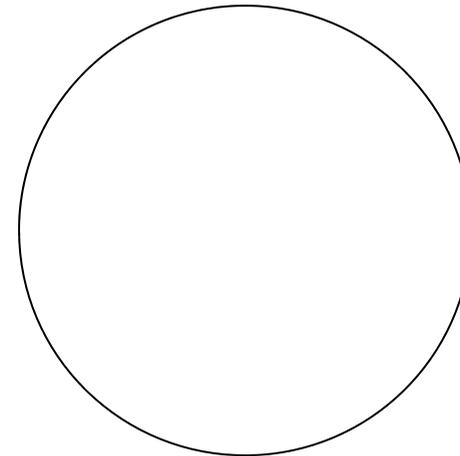

Let your pencil follow an ant’s trail around your plant’s edges.

NMP Activity

Nature Sketching

Plant name:

Location:

Use the circle to draw a zoomed in picture of the details of your plant.

Try to include:

- Observations
- Personal Notes
- Science terms
- Zoomed section
- Questions
