

FIRE EMERGENCY GUIDE

Abram's Cottage - 321 Helman St Ashland, OR 97520

This guide has been prepared to let you know of the fire safety features of your building (see evacuation plan below).

In the event of a fire emergency inside,

- Leave your apartment immediately
- Call 9-1-1
- Once outside, go to the designate meeting place
- Do not return to the building until the fire department has said it is safe to re-enter.

Your apartment building is equipped with fire safety equipment and tools which will help to protect you.

Smoke Alarms

This cottage is equipped with a smoke alarm in each bedroom and one in the hall. The smoke alarms are powered by battery.

In order to make sure the smoke alarm works when it is needed, please do the following:

- Test the smoke alarm monthly
- Change the smoke alarm battery annually
- Never remove or disable the smoke alarm

Carbon Monoxide Alarm

This cottage is equipped with a carbon monoxide alarm in the kitchen in a location within 5 feet from each bedroom. The carbon monoxide alarm will sound when there is a level of carbon monoxide that is dangerous. Carbon monoxide is a clear and odorless gas that is toxic and can be created from incomplete combustion of natural gas, propane, or vehicle exhaust. Carbon monoxide can kill you.

If your carbon monoxide alarm sounds, please do the following:

- Press the test or reset button on the alarm.
- If the alarm continues to sound
 - Evacuate everyone from your apartment
 - Call 9-1-1
 - Follow the recommendations of the firefighters
- Contact the natural gas company if a natural gas appliance is the possible problem.

Portable Fire Extinguishers

Fire extinguishers are located in the loft and in the laundry room. These extinguishers can be used by residents to put out a fire if safe to do so. Please familiarize yourself with where the fire extinguishers are in the event that you need to use one. You will see them located on the emergency evacuation plan diagram.
