

**Electric Power Purchase Agreement
For Renewable Energy Systems**

Customer/Generator Information

Name: _____

Mailing Address: _____

Street Address of
Electric Generating
Facility:

Electric Utility Bill
Account Number:

Daytime Phone: _____

Email: _____

Recitals:

- A. The City of Ashland encourages citizens and businesses to invest in renewable electric energy generation systems.
- B. Customer/Generator produces electricity from an electric generating facility that qualifies for purchase by the City of Ashland under the City's Renewable Resource Purchase Policy.
- C. Customer/Generator has met the City's design requirements for interconnection and has entered into an interconnection agreement with the City.

City and Customer/Generator agree as follows:

The net energy produced by Customer/Generator's facility for a billing cycle will be credited towards the next billing cycle. Such crediting shall occur for each subsequent billing cycle until December of each year. If a credit is still owed at that time the City will purchase from Customer/Generator the first 1,000 excess kilowatt-hours (kWh) at the rate of 1.25 times the highest block for City's residential electric rate. Any kWh's generated in excess of 1,000 kWh will be purchased at the City's wholesale power rate at the time of the credit.
