HISTORIC DISTRICT DEVELOPMENT STANDARDS
HISTORIC BUILDING BRIEF No. 5

General Guidelines
- Retain and preserve historic garages and outbuildings whenever possible.
- New buildings should not visually detract from the main house.
- New buildings should be placed behind the front line of main house.
- Single-width garage doors maintain the character of historic neighborhoods. Multiple garage doors detract from historic character.

History
- Garages originally were separate buildings placed behind the house, often accessed from alleys.
- Began to be incorporated into houses in 1920s. Usually placed on side of house, in hilly locations they were often tucked underneath.
- Doors were usually swinging doors, one car width wide.

- Garages in Ranch Style houses were under the same roof as main house and often placed in front.
- By 1970s, garages were one of most prominent features of a house. Typically placed closer to street, and with wider doors than earlier examples.
- Other types of historic outbuildings include sheds for storing garden/farm equipment, wood sheds, pump houses, spring houses and outhouses.

Placement and Size of New Garages/Outbuildings
- Locate as inconspicuously as possible on side or rear of main house. Preferably placed behind rear line of main house.
- Must meet current City codes on setback and lot coverage ratios.

This project is supported in part by a grant from the Oregon State Historic Preservation Office, Oregon Parks & Recreation Department, funded by the National Park Service through the National Historic Preservation Act.
Garages/Outbuildings

- Utilize smaller footprints than main house and limit to one-story in height.
- Follow historic setback patterns of other garages and outbuildings on street or in district.
- Locate sheds and gazebos in rear yards.
- Screen from public view with landscaping.

**Should outbuildings match style of main house?**
- Design of new buildings should be secondary to and simpler than that of main house.
- Materials should reflect the use and function of building, not that of main house.
- Compatibility with historic district and streetscape, not just main house, is important.
- Use roof form that compliments main house in shape and pitch.
- Metal, plastic, vinyl or canvas prefabricated outbuildings or carports are inappropriate.

**Garage Doors**
- Paint to complement garage.
- Use single width doors. If two-car garage is desired, use separate single-width doors for each bay.
- Metal doors are not appropriate, but if used they should be painted.
- Overhead wood doors that reflect the character of historic swinging doors are good options.
- If doors are highly visible from a public street, wood paneled doors are preferred.
