City of Ashland  
PARKS AND RECREATION COMMISSION  
TRAIL MASTER PLAN UPDATE COMMITTEE  
MEETING MINUTES  
January 26, 2018

PRESENT:  
Parks Commissioners: Jim Lewis, Mike Gardiner  
City and APRC Staff: APRC Director Black; APRC Interim Parks Superintendent Jeffrey McFarland; GIS Analyst Lea Richards  
APRC Minute-taker: Betsy Manuel

ABSENT:  
Chief-Forestry Resource Chris Chambers; Torsten Heycke

I. CALL TO ORDER  
Chair Chapman called the meeting to order at 10:00 a.m. in the Siskiyou Room of the Community Development Building, 51 Winburn Way in Ashland, OR.

II. APPROVAL OF MINUTES  
a. December 29, 2017  
Jensen asked that the Minutes be changed as follows:

Page 3 Paragraph 4: “He stated that often those types of changes included punctuation as well as sentence construction and they could be so common that the document was not readily readable….”  
Should be: “He stated that often those types of changes included punctuation as well as sentence construction and they could be so common that the document would not be readily readable….”

Motion: Gardiner moved for approval of Minutes for December 29, 2017 as amended. Jensen seconded and the motion carried. The motion carried.

III. PUBLIC PARTICIPATION & GUEST SPEAKERS  
• Open Forum  
Two written comments were received via Google docs.

Black suggested that the comments be included in Agenda Item Public Participation so that people who submit them would see that their comments have been acknowledged.

IV. ADDITIONS OR DELETIONS TO THE AGENDA  
There were none.

V. UNFINISHED BUSINESS  
There was none.
VI. NEW BUSINESS
   a. Discuss/Present Public Comment/Review Information

McFarland reported that public comment had been received for the Google docs Trails Master Plan edits. He stated that a button had been added to Google docs to allow access to a form designed to facilitate public comments.

McFarland noted additional access was available through the City's website. A click button provides a link to the form entitled “Contact the TMP Committee.” Chapman stated that when a completed form has been submitted, it is sent by email to TMP Chair David Chapman, Interim Parks Superintendent Jeff McFarland, APRC Promotions Coordinator Dorinda Cottle and Final Editor Steven Jensen. The information will then be presented to Committee members at the next regularly scheduled TMP meeting.

McFarland noted that all public comments are automatically saved to a spreadsheet for recordkeeping. Any comments that are pertinent to a particular Chapter will then be sent to the Chapter editor. In response to a question by Brandy, Black replied that the comments would automatically become part of the public record. McGinnis suggested that public comments be solicited during a specific timeframe so that there are no surprises once the document is completed. Chapman added that once the editing process has been completed, there would be a series of public announcements with opportunities to comment prior to sending the document to the consultant for publication. McFarland noted that an open house could be held as well.

Black noted that there were two different channels for soliciting input – the first being prior to completion of the Master Plan – when people want to respond while the Master Plan update process is underway based on specific areas of interest. The second solicitation of public input could take place once the edits have been completed and people have an opportunity to review the final document.

Gardiner offered to talk about the Trail Master Plan Update as part of a monthly series in the Ashland Daily Tidings called “Park Views.” He stated that he could provide an overview of the Committee's work in a “Park Views” article in February. There followed a brief discussion about submitting the article to other publications as well.

McFarland explained that the public would have access to the original Master Plan but not the edited versions until the edits were “accepted” by the Chapter editor. He stated that he could not reassign or take any action until the Chapter editor “accepts” the edits. The mechanism for accepting the edits is a checkmark. When there are multiple editors on a Chapter, each one should click to accept upon closing.

Chapman detailed the steps that must be taken to complete the Chapters and add commentary so that the next editor can see the editing history. He suggested that a table be added at the top of the document with checkmarks that document where each Chapter is in its development – whether it is in its original state, or is currently undergoing edits as a draft copy, or when the final edits have been made and approved.

McGinnis asked about procedures for questions and/or the gathering of information. It was agreed that asking for information was acceptable within the edited draft, but that comments must be forwarded to APRC staff so the commentary could be made public.
Brandy noted that he adds parenthesis with comments into the document itself as a tool for reminders or for other editors to see. McFarland agreed, noting that such commentary could act as placeholders for information. McGinnis stated that there were redundancies within the original Master Plan that were repeated in the Appendix as well. It was agreed that the final editor would bring any unresolved redundancies or questions to the Committee for a final decision.

Chapman stated that once a Chapter editor had completed his work and accepted the draft, a note should be sent to McFarland so that he could move the document into a completed Chapters folder. Jensen noted that mapping should be included as a step in the finishing process.

Richards stated that it was helpful to read the Chapters once they have been completed in order to develop a map that would depict the locational information defined in each Chapter. She explained that for new areas such as the Cascade Foothills area, finding the reference points described in the text assisted her in determining mapping for the area. Richards stated that highlighting any additional references points listed in existing Chapters would be helpful. She indicated that there was a maps folder in Google maps that contains draft copies of the maps. Chapman commented that sending her questions while writing the new Chapters would give her time to evaluate the Chapter for mapping.

b. Editor's Corner: Editing Clarifications

Citations
Jensen recommended that citations should be included in parenthesis at the end of the referencing paragraph. He suggested posting the information (including the date) without formatting. The final editor would format each Chapter for uniformity.

Brandy stated that online version could contain a hyperlink and page number that would go directly to the referencing document.

Jensen inquired whether Committee members would prefer to list the citations at the end of each Chapter or in an Appendix. McGinnis stated his preference for inclusion as an Appendix. Jensen agreed, noting that the citations would be in alphabetical order. In response to a question by Brandy, McGinnis proposed that references become footnotes with a hyper link. Once completed footnotes would become numbered end-notes. It was agreed by all that footnotes would be used rather than parenthesis.

Update
Jensen talked about the most pertinent way to describe the work of the Trails Master Plan Committee. He stated that in his opinion, the work was more substantial than described when using the word “update.”

Ashland City Planner Brandon Goldman noted that the term “update” was common vernacular in governmental circles. He stated that an update communicates that there has been a superseded document. Chapman noted that using the word “update” as descriptor implies that there are historical references to the Trail Master Plan.

There followed a brief discussion about the difficulties in formatting copy. McFarland explained that it was most likely because the material had been scanned and uploaded.

Glossary
Jensen noted that a decision should be made regarding the Glossary and what it would include. He asked that if a Chapter editor has a word that should be explained, it should be so noted at the end of the Chapter.
Appendix
Jensen explained that the Appendix should only exist if it is referred to in the Chapter write-up. (i.e. “see Appendix”). He stressed that the Chapter should be able to stand as written without an Appendix.

Trail Safety and Etiquette
In response to a question from Jensen, Chapman noted that in Chapter II – Objective C-3 was to create and promote a “trail etiquette” protocol.

Brandy talked about the trails section in the 2016 Ashland Forest Plan where the different uses were detailed. He stated that it was important to explain the different uses and what the protocols were. Brandy noted that pedestrian safety was an integral part of a good plan. McFarland agreed referring to Appendix A.

Fauna
Chapman noted that it might be appropriate to list fauna in the Appendix with possibly a small paragraph in the corresponding Chapter as a reference.

McGinnis asked if flora and fauna would be referenced in every Chapter. He noted that the Eastside and Westside chapters mentioned the flora and fauna in the context of the terrains. Brandy suggested that the focus should be on the trails but not on the geologic history.

c. Discuss Flora Questions – Appendix D
McFarland noted that there was a comprehensive list of the flora in Appendix D. He proposed that the list be stricken and references should be made where appropriate with a link to a referenced authority – such as the Native Plant Section of the 2016 Ashland Forest Plan.

McFarland stated that the Cascade Foothills would link to SOLC for discussion of the flora in that area. It was agreed that one page in the Appendix would contain the links to the various reference materials.

In response to a question by Jensen, McGinnis suggested that differences in the wildlife or vegetation could be briefly noted in the pertinent Chapter to provide perspective. Links could then provide more comprehensive discussion as needed. McFarland noted that many of the corridors contain sensitive riparian areas that contain specific types of flora and fauna. Brandy noted that he had included a sentence or two in the Regional Trails Chapter that highlighted changes from Ashland's watershed areas to the high mountain forests. Existing historic information about the trails would be carried forward. Richards stated that it was important to include points of interest.

In response to a question by Jensen about indigenous peoples and their cultural impact, Black relayed that the Nature Center had taken that on as part of their educational efforts. McGinnis noted that there could be a link to forestland trails that discussed indigenous people and their impact on the development of trails. Brandy noted that there were more extensive references in other publications as well. It was agreed that references would be included in the Appendix.
d. Discussion/Review Chapters 1 & 2

Chapman noted that the original Trails Master Plan had been approved by the Ashland City Council in 2006. He explained that the updated vision and mission had been discussed and approved early on by the TMP Committee so it was inserted into Chapter 2. Chapman stated that the goals and objectives as originally written were incorrectly identified. He commented that after several tries he left the goals and objectives as written – adding an explanation that specified that the goals and objectives were areas of concern and interest.

Chapman stated that he had added a section called “Trail Access and Parking.” He described the rationale that had the methodology for a new paragraph as follows:

“An urban trail system is analogous to a mass transit system in that there are multiple access points along a system of linked corridors as opposed to the traditional trailheads in remote trail systems. These points are intended to be within a reasonable walk from home or destinations. Access to the system via vehicle, with the exception of stations or transfer hubs or park-n-rides, is through finding nearby legal street parking. In general, function of major trailheads, which provide parking, restrooms and water, will be provided by our existing or future parks. It may be necessary in some areas that are heavily used for recreation to add new parking or facilities. Each corridor should identify and map the location of all facilities”.

Black stated that the viewpoint expressed was consistent with a transportation system. Brandy indicated that the sentence about stations or transfer hubs or park-n-rides might be best edited to refer to nearby, legal street parking only. The availability of parking was discussed as well as how to represent current parking and future possibilities.

Chapman noted that the overview for Chapter 2 was written to include goals and objectives, but that the objectives as outlined in the original Master Plan were actually goals. Black stated that objectives do not have to be detailed and in fact, tend to change over time.

It was agreed that further discussion about goals and objectives would be placed on the Agenda for the next regularly scheduled meeting.

VII. UPCOMING MEETING DATES

February 9, 2018, Siskiyou Room, Community Development Building, 51 Winburn Way - 10:00 a.m.

VIII. ADJOURNMENT

There being no further business, the meeting was adjourned at 11:40 a.m.

Respectfully submitted,

Betsy Manuel, Minute-Taker
Trail Ashland Parks and Recreation Commission

These Minutes are not a verbatim record. The narrative has been condensed and paraphrased at times to reflect the discussions and decisions made. Ashland Parks and Recreation Commission Subcommittee meetings are digitally recorded and are available upon online.
