The city's investment strategy is active. Preservation of capital and maintenance of sufficient liquidity will be considered prior to attainment of market return performance. A market benchmark will be determined that is appropriate for longer term investments based on the City’s risk and return profile. When comparing the performance of the City’s portfolio, all fees and expenses involved with managing the portfolio shall be included in the computation of the portfolio’s total rate of return. This would include any in-house management of the funds, as well as outside management.

The Investment Officer shall prepare monthly and quarterly compliance summary reports that provide details of the investment portfolio, as well as transaction details for the reporting period. Details shall be sufficient to document conformity with the provisions of the statutes and this
investment policy and shall include a listing of individual securities held at the end of the period. All investments owned will be marked-to-market monthly by the City’s third-party custodian.
