

residential ENERGY EFFICIENCY PROGRAMS

The City of Ashland offers a wide range of energy efficiency programs and technical assistance that cover the primary energy uses within a home.

Appliances

Rebates for purchases of qualified Energy Star appliances are available to City of Ashland electric utility customers using a simple one page form, along with a proof of purchase receipt. Refrigerator or freezer incentive is only for replacement of units that have been properly decommissioned and recycled by Recology Ashland. Rebates include:

Refrigerator or freezer (only eligible with existing refrigerator free recycling service)	\$50
Washing machine (includes water savings incentives)	\$50 (with gas water heating) \$80 (with electric water heating)
Electric clothes dryer	\$50

Rebates for appliances on qualified products lists only – energystar.gov/products/appliances

Free, low flow shower heads

Low flow shower heads that save water and energy are available for free to City of Ashland Electric customers. Stop by our offices and pick one up (up to two per household).

Lighting

Rebates for high efficiency residential lighting, now primarily LED, are done with City Electric Utility participation and investment in the regional “Simple Steps Northwest” lighting program with “instant rebate” discounts available at the point of sale. Visit simplestepsnw.com for a list of participating retail stores in our area.
