SUMMARY

The proposed ordinance is to reconcile two Ashland Code provisions concerning the trimming or removal of trees and other vegetation impacting public streets, alleys and to bring the City's required minimum vertical clearance above City streets and alleys into compliance with Oregon Revised Statutes.

POLICIES, PLANS & GOALS SUPPORTED

Provide, promote, and enhance the security/safety, environmental health, and livability of the community. (Quality of Life Administrative Goal)

PREVIOUS COUNCIL ACTION

In 2002, AMC 13.16.070 established the vertical clearance distance for trees and shrubs above public streets at fourteen feet and above alleys at twelve feet. In 2010, AMC 9.08.120 was enacted to set the minimum vertical clearance distance for branches that hang above sidewalks or streets at not less than eight feet above sidewalks and not less than 12 feet above streets.

BACKGROUND AND ADDITIONAL INFORMATION

ORS 818.080 establishes maximum allowable height of vehicles, including load, as fourteen (14) feet for any vehicle on public roadways. The City of Ashland operates some large vehicles just under 14 feet tall. On occasion, the City's own vehicles or private service vehicles cause damage to tree or shrubs which overhang streets or alleys a distance of 13.5 feet or less. As to clearance heights for trees and shrubs above streets and alleys, the two current City Code provisions establish standards that are inconsistent with each other and with vehicle height allowance in the state statute. For clarity and consistency, the code provisions on clearance heights above public streets and alleys subject to vehicle use should be reconciled and conformed to the maximum height allowed for trucks.

FISCAL IMPACTS

The added costs of these minor Code revisions are expected to be negligible for the City and for affected property owners. In all but an estimated dozen or so cases, the actual clearance heights above City streets and alleys subject to vehicle use are already close to 14 feet. City ordinances already require at least 12 feet of clearance above City streets and alleys. Under the proposed new standard, affected property owners will be required to undertake only a little more trimming than they are already supposed to be doing. The slightly higher clearance standard seems likely to result in reduced damage to trees and vehicles so as to offset additional tree maintenance costs from a community-wide perspective. A few individual property owners, however, may have to pay a little more for trimming than in the past.

STAFF RECOMMENDATION

Staff recommends approval of First Reading of the attached proposed ordinance.
