

## What if I need a home repair?

Keeping your home free from outside visitors is an important way to limit the spread of COVID-19, but sometimes you may need to have someone in your home for a necessary repair. If you do need to have a repair person or other visitor in your home, here are some steps to limit the risk of spreading COVID-19.

- Look on the repair company's website or ask them what they are doing to reduce the risk of spreading COVID-19.
- Make sure the visitor knows that you expect them to wear a well-fitting mask.
- Stay at least 6 feet away from the visitor.
- Everyone in the house should wear a mask while the visitor is present, including those who live there.
- Open doors and windows.
- Place a fan near an open window or door, blowing outside.
- Turn on the exhaust fans in your bathroom and kitchen. Keep them running for one hour before and after the visit to remove virus particles.

More information on ventilation is on the [Centers for Disease Control and Prevention website](https://www.cdc.gov/coronavirus).
