

**Public Arts Commission**  
**Earthly Goods Walkway**

1. What percentage of the wall should be covered? The wall is approximately 20 ft. tall at the E. Main sidewalk. The length along the walkway is unknown.
2. How close to the wall should the installation be? The base wall is approximately 12" wide. Attaching a structure too close to the edge could be structurally unsound.
3. Can the installation be attached to the Earthly Goods wall?
4. How would the different levels of the wall be accommodated?
5. How would grill cutouts in the wall base be accommodated?
6. How would alarm/outlets be accommodated?
7. How will there be access to the wall for repair/repainting in the future?
8. If there is to be seating opposite the wall, will that necessitate removing plants in that location?
9. How would power for lighting be installed?
10. How much lighting would be from reflection against the wall or how much would be directed at the walkway?
